SUMMARY

Full-Stack AI Engineer experienced in building AI-powered compliance tools, agentic workflows, backend APIs, and data pipelines for fintech/blockchain products. Skilled in Python, FastAPI, JavaScript, SQL, n8n, web scraping, and multi-agent LLM integration, delivering production-ready features across compliance, analytics, and automation.

EXPERIENCE

CryptoCompliance.AI

Dubai, UAE

Full-Stack AI Engineer

Dec 2025 – Jun 2026

- Built AI compliance, blockchain analytics, and trading analysis tools for cryptocurrency monitoring and risk analysis.
- Built FastAPI services, data pipelines, and workflows with Redis, TimescaleDB, Supabase, and Railway.
- Deployed production AI workflows and database-backed services supporting compliance and analytics features.
- Designed LLM multi-agent systems with dashboards to automate data collection, analysis, and reporting.
- Integrated AI features across frontend and backend workflows for internal and client-facing products.
- Developed an AI-powered trading bot that achieved 10% simulated profit in testing.

RoveHaven Holiday Homes

Dubai, UAE

AI Workflow and Development Intern

Jul 2025 – Aug 2025

- Built 30+ n8n AI workflows for lead generation, scraping, listing analysis, and online presence automation.
- Designed agents to analyze Airbnb listings, host details, pricing signals, and review insights and handled customers.
- Automated data collection and enrichment workflows for lead qualification, business dev, and property research.

VestinGrow Sustainability Solutions

Dubai, UAE

Program Developer Support

Dec 2024 – Jul 2025

- Overhauled and maintained the company website using WordPress, Figma, and HTML/CSS to support brand launch and outreach.
- Built the MVP for their B2B sustainability platform, supporting investor presentations and product validation.

Alif Technologies Consultants

Dubai, UAE

Computing Intern

May 2024 – Aug 2024

- Developed, tested, and maintained WordPress websites and web apps for clients.
- Improved performance and technical SEO through backend optimization, security updates, and maintenance.
- Helped in database management, including creating, modifying, and querying databases for better performance.

PROJECTS

AgentTrail – Agentic AI Trip Planner | FastAPI, Vertex AI, Google Cloud, LLMs, Web Scraping, APIs

Sep 2025 – May 2026

- Led development of an agentic AI trip planner generating personalized itineraries from live data and APIs.
- Built backend workflows for scraping, itinerary generation, recommendations, and trip data storage.
- Integrated LLM/web agents with Vertex AI and Google Cloud to automate travel suggestions.

Kickstarter Success Prediction

Sep 2024 – Dec 2024

- Cleaned Kickstarter datasets and engineered features for ML analysis.
- Trained XGBoost and Random Forest models to predict campaign success and viability.
